

Cadmatic Ltd is a leading developer of intelligent 3D-modeling based plant and ship design solutions. Our customers are industrial plants, EPC suppliers, shipyards and consultants. Cadmatic software solutions have been implemented by 4000 users in over 42 countries. Exports account for 90% of our turnover. Our success is based on our technical expertise and knowledge of application areas. We are part of Elomatic group which employs more than 600 employees.

**We are looking for an expert to join our steadily growing international business.**

## **Software Engineer (1) – Product Platform**

You will take part among others in the development of our software's general technology platform and components.

We value know-how of object orientated methods and user interfaces, perseverance and flexibility, a suitable university or polytechnic degree and an interest in our application areas. You are able to use or would like to learn how to use the following tools: C, C++, .NET/C#, WPF.

Please contact Mr Teemu Valtonen for more information: +358 40-5324094, or email him at: [teemu.valtonen@cadmatic.com](mailto:teemu.valtonen@cadmatic.com).

We offer interesting and challenging work in an international working environment at the forefront of know-how in the field in a successful and steadily growing company that offers competitive benefits, opportunities and motivated colleagues.

Send your application with salary request and CV to Cadmatic Ltd, Itäinen Rantakatu 72, 20810 Turku by the 10th of March 2008 (Mark the position you are applying for on the envelope) or by email to [miaa.itameri@cadmatic.com](mailto:miaa.itameri@cadmatic.com).

**THE ELOMATIC SOFTWARE COMPANY**
