

## Plant Modeller & Pipe Basic User

This training is meant for 3D designers. The duration of the basic training is 5 days. No specific knowledge about the software is necessary when participating in this course. Some basic knowledge about piping layout, making drawings and ISO/Spool drawings is required.

<b>Elementary knowledge:</b>	Basic knowledge about piping design and piping drawings
<b>Total training days:</b>	5 days
<b>Maximum participants:</b>	6 users

---

### Day 1

- Query measure & Query object
- Create & modify views
- Navigation commands & Digitizing commands
- Object types
- Locate equipment
- Basics of pipe routing
- Using eBrowser

### Day 2

- Pipe routing
- Insert valves & instruments

### Day 3

- Making penetrations & holes
- Insert beams
- Route HVAC
- Model Plates
- Route Cable trays

## Plant Modeller & Pipe Basic User...

OPTIMIZING RESOURCES

### Day 4

- Set operations
- PM drawings & revision control

### Day 5

- Plotting and exporting PM drawings
- Bill of material & Listings
- Piping Isometrics
- Creating & updating Isometrics & spool drawings
