

Release notes

Below are the release notes for CADMATIC Draw version 2022T2.

The following conventions apply to these release notes:

- File names, path names and environment variables are in *italics*.
- Commands, options, dialog names, and menu choices shown in the user interface are in **bold**.

New and improved features

PDF reference drawing	Improved support for PDF reference drawings.
MText	Option to add background color and frame for MText.

Bug fixes

- Fixed view clipping with free planes.
- Fixed a bug in importing distribution boards from IFC model.
- Fixed a bug that might cause hatch to display incorrectly.
- Fixed a bug that caused frozen layers to print in a shaded viewport.
- Fixed a bug where offset function causes the program to crash if offset is used on a hatch.
- Fixed visualization window's view clipping buttons.
