

# Release notes

---

Below are the release notes for CADMATIC Draw version 2023T1.

The following conventions apply to these release notes:

- File names, path names and environment variables are in *italics*.
- Commands, options, dialog names, and menu choices shown in the user interface are in **bold**.

Edit symbol properties	Added a new tool to modify symbols on multiple drawings using definition files that are saved in Excel workbook format.
Cloud	Added a possibility to draw clouds that rectangular, polygonal or shaped like existing elements in the drawing.
Viewing shaded drawings	Improved rotating of view direction in shaded drawings.

## Bug fixes

- Fixed a bug that caused attribute texts to go behind wipeout elements when symbols were exploded.
- Fixed a bug that could cause object's xdata to disappear when copied to another drawing.
- Fixed a bug that could cause hatch drawn with Solid pattern to display incorrectly in shaded drawing.
- Fixed a bug that could cause the program to crash when IFC-model is removed from a drawing.
- Fixed a bug that caused text element's common attributes to disappear when saving to dwg-format.
